

## **HQ603 Fleet Management System RFP Questions and Answers Document – October 2024**

Q. Department-based cost allocation for mileage, repair, and maintenance. What are the requirements for allocating costs? Does this include integration with a financial system or simply tracking costs in the FMS?

A. This is mainly tracking the cost and allocation in the FMS. The FMS should be able to generate accurate reports based on the information entered into the system for cost allocation. Such cost allocation reports will be presented to finance when the invoices are submitted for payment. Ideally the reports should come with all the finance code details. We may need to look at the possibility of having date file and integrate them into Navigator as that will make the workflow easy for finance and logistics as well avoid all date entry and misallocation issues when the workflow is automated.

Q, Future purchase planning of fleet. Are there currently utilization and replacement metrics in place or will defining these be part of the project?

A. Currently MC does not use such replacement matric. This is mainly due to the lack of information. However, we would like to have such replacement matric data produced by the future FMS such as giving the indicate for replacement base on either given mileage, similar number of years in use or the total maintenance cost as percentage of acquisition cost or any industry best practices.

Q. Timely recording of fuel, mileage, maintenance & repairs, and trip environmental impact inclusive of vehicle acceleration and braking metrics. Are fuel integrations required? If so, which provider(s)?

- A. We would like to have all matrices in timely recording of fuel, mileage, maintenance & repairs, and trip environmental impact inclusive of vehicle acceleration and braking metrics. If the fuel integration is something similar to app based or device based real time information the driver has to update as and when fuel and integrate it to FMS, we would like that option to see further.
- Q. Are maintenance integrations required? If so, which provider(s)?
  - A. Not necessarily because we use ad-hoc suppliers in the field in different locations and most of them do not have a system to integrate to our FMS. But we would like to have the ability

in the FMS, the drivers to request maintenance needs through app or handheld device where such information passed into FMS for review and approvals by the logistics staff. Then we can track each request, review and approve all the way to the work provided and the payment made etc.

Q. Will trip environmental impact be available from one or more telematics providers? If so, which providers?

A. Ideally, we are looking at this option to be part of the FMS as a single solution. However, we understand that such telematic solutions are provided by different suppliers. You need to provide us with the two options of 1. Telematic is included in the FMS (or integrated) or 2. The suppliers who can provide compatible integrated to your proposed FMS. Both cases we need to know the cost for telematics. If you have partnerships with such telematics providers, you can include their cost details in the proposal as all inclusive. Otherwise, we will consider that you will only provide the FMS and telematics are not included.

Q. Vehicle tracking functionality and the ability to remotely immobilize. Tracking functionality can be accomplished through integration with one or more telematics providers. Please note, remote immobilization is not available through the FMS.

- A. Refer to above.
- Q. GSM & Satellite capability. Is this a Telematics specific requirement?
  - A. Refer to above.
- Q. Software and hardware are upgradeable throughout the duration of the contract. Is this a Telematics specific requirement?
  - A. Refer to above.
- Q. Compatibility with other MC systems e.g. Microsoft tools, ERP, SAP Ariba etc. Please provide the list of required system integrations and the data to be integrated.
  - A. Integration will be to a data warehouse
- Q. Are you expecting motorcycles to be immobilized remotely?

A. This may not be worth given the lower value of the assts and even after immobilization still the moto cycles can be transported by thieves in other modes of transport. The investment will not be worth the return.

## Q. Are you able to provide a fleet list?

A. Yes, we are able to provide the current fleet list for your review to understand the current fleet at MC. Please see attached file to this Q&A.

Are you able to clarify the location of current country offices?

Α.

Country	Region	Country	Region
Ethiopia	Africa	Iraq	Middle East
Kenya	Africa	Jordan	Middle East
Somalia	Africa	Lebanon	Middle East
South Sudan	Africa	Yemen	Middle East
Tanzania	Africa	Palestine	Middle East

Sudan	Africa	Afghanistan	Asia
Niger	Africa	Myanmar	Asia
Colombia	LAC	Ukraine	Asia
Guatemala	LAC		
Haiti	LAC		
Venezuela	LAC		

Can you provide further explanation of the requirement "future purchase planning of fleet"?

A. This is referred to the fleet replacement matrices or information.

- Q. Is the intention to equip all of the fleet (approx. 700 cars & 1,100 motorcycles) with telematics devices?
  - A. Given the asset value, ideally telematics should only be for vehicles with all options including remote immobilization. For motorcycles we may need a simple tracking system.
- Q. Is the intention to install devices on [some or all of] the fleet in their countries of operation (i.e., the vendor will be expected to coordinate a rollout of devices to vehicles in multiple countries)?
  - A. When it comes to hardware such as telematics devices, if installation is required the preference is the vendor to have local support to install the telematics and coordinate any after installation services or troubleshooting, if needed.
